Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. In light of applicant's amendment have been fully considered and are persuasive. The previous rejection of 1-16 has been withdrawn. However, upon a review of the claims, some of the claims are found to violate 35 USC 112 second paragraph as set forth below, which was not previously recognized. In addition, there were found some objectional claim language as set forth below.

2. Claims 1 are objected to because of the following informalities:

Claims 1 and 13 were amended to include "the Nc chips a continuous noise transmitted waveform separated by a fixed time interval." The phrase is not understood well unless it is read as "**each** of the Nc chips **comprising** a continuous noise transmitted waveform separated by a fixed time interval." Emphasis added.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 5 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is written to "further" comprise the receiver defined in claim 1. The claims give an impression the limitations are added to those recited in claim 1. But apparently, the delay

and signal multiplier replaces the bank of correlator. Without specifically identifying which element of claim 1 is further limited, it appears that two different embodiment of the present invention is confusingly mixed by the way claim 5 is written.

Claim 28 recites the steps of “correlating the received sum,” “multiplying delayed and undelayed” and “integrating the multiplied delayed and undelayed versions” as if they are separate steps. However, in accordance with the disclosed invention, the last two steps are substeps of the first step. To avoid confusion it is suggested that the multiplying and integrating steps be identified as substeps of the correlating step.

Drawings

5. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

6. Claims 1-4,6-27 are allowed.

7. Claims 5 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
